

Helsingborg 20th April, 2021

To whom it may concern:

Candidate list declaration

The REACH-regulation (EC 1907/2006) include criteria for Substances of Very High Concern (SVHC). Substances meeting these criteria are identified and listed according to article 59. Companies selling articles containing more than 0,1 percent by weight of substances on the candidate list need to declare this with information on safe handling.

Articles from Elektrokoppar do not contain substances included on the REACH candidate list exceeding the specified concentration limit. This judgement is based on the chemical composition of our raw materials and our process chemicals.

Please contact us if you would need further information regarding SVHC-substances

Yours Sincerely,

Jonas Ciardi
Technical Manager QHSE
AB Elektrokoppar
